taking you from good to GREAT.....

NBIT provides training to professionals, graduates and those seeking to advance their career. We specialize in offering the most comprehensive courses at the best value in the market. No matter who you are, what industry you're in **NBIT** has a course that will help you to reach your goals.

C	TALLY PRIME, TALLY 9[ERP]
C++	FACT
JAVA	BUSY
J2EE (with Spring & Hibernate)	PROFESSIONAL ACCOUNTING
DOT NET (C#, ASP, MVC)	CORPORATE ACCOUNTING
ORACLE 21C	MS-OFFICE
PYTHON	DCA
ANDROID with KOTLIN	DTP
JAVASCRIPT	AOA
JQUERY	ADCA
ANGULAR JS, NODE JS, REACT JS	ADTP
PHP	ADPGD
PHP++	WEB-DESIGNING
AUTOCAD(Mech/Civil/Elec)	TYPING (HINDI/ENGLISH)
CATIA V5	MANGAL TYPING
SOLIDWORKS	DIPLOMA IN HARDWARE
NX CAD	DIPLOMA IN INTERNET
PRO-E

Software & Hardware Education

Distinguish Yourself

Successful students can be distinguished from the average student by their attitudes and behaviors. Below are some profiles that typically distinguish between an "A" student & a "B" student. Where do you fit in this scheme?

The "'A'" Student – An Outstanding Student

ATTENDANCE:
"A" students have virtually perfect attendance. Their commitment to the class is a high priority and exceeds other temptations.

PREPARATION:
"A" students are prepared for class. They always read the assignment. Their attention to detail is such that they occasionally can elaborate on class examples.

CURIOSITY:
"A" students demonstrate interest in the class and the subject. They look up or dig out what they don't understand. They often ask interesting questions or make thoughtful comments.

RETENTION:
"A" students have retentive minds and practice making retentive connections. They are able to connect past learning with the present. They bring a background of knowledge with them to their classes. They focus on learning concepts rather than memorizing details.

ATTITUDE:
"A" students have a winning attitude. They have both the determination and the self discipline necessary for success. They show initiative. They do things they have not been told to do.

TALENT:
"A" students demonstrate a special talent. It may be exceptional intelligence and insight. It may be unusual creativity , organizational skills, commitment – or a some combination. These gifts are evident to the teacher and usually to the other students as well.

EFFORT:
"A" students match their effort to the demands of an assignment.

COMMUNICATIONS:
"A" students place a high priority on writing and speaking in a manner that conveys clarity and thoughtful organization. Attention is paid to conciseness and completeness.

RESULTS:
"A" students make high grades on tests – usually the highest in the class. Their work is a pleasure to grade.

Distinguish Yourself

Successful students can be distinguished from the average student by their attitudes and behaviors. Below are some profiles that typically distinguish between an "A" student & a "B" student. Where do you fit in this scheme?

The "'B'" Student – An Average Student

ATTENDANCE:
"B" students are often late and miss class frequently. They put other priorities ahead of academic work. In some cases, their health or constant fatigue renders them physically unable to keep up with the demands of high-level performance.

PREPARATION:
"B" students may prepare their assignments consistently, but often in a perfunctory manner, Their work may be sloppy or careless. At times, it is incomplete or late.

CURIOSITY:
"B" students seldom explore topics deeper than their face value. They lack vision and bypass interconnectedness of concepts. Immediate relevancy is often their singular test for involvement.

RETENTION:
"B" students retain less information and for shorter periods. Less effort seems to go toward organizing and associating learned information with previously acquired knowledge. They display short – term retention by relying on cramming sessions that focus on details, not concepts.

ATTITUDE:
"B" students are not visibly committed to class. They participate without enthusiasm. Their body language often expresses boredom.

TALENT:
"B" students vary enormously in talent. Some have exceptional ability but show undeniable signs of poor self management or bad attitudes. Others are diligent but simply average in academic ability.

EFFORT:
"B" students are capable of sufficient efforts, but either fail to realistically evaluate the effort needed to accomplish a task successfully, or lack the desire to meet the challenge.

COMMUNICATIONS:
"B" students communicate in ways that often limit comprehension or risk misinterpretation. Ideas are not well formulated before they are expressed. Poor listening / reading habits inhibit matching inquiry and response.

RESULTS:
"B" students obtain mediocre or inconsistent results on tests. They have some concept of what is going on but clearly have not mastered the material.

Core Python

Duration:
4 Months

- Introduction to Python
  - ✓ Why Python
  - ✓ Application areas of python
  - ✓ Python implementations
    - Cpython
    - Jython
    - Ironpython
    - Pypy
  - ✓ Python versions
  - ✓ Installing python
  - ✓ Python interpreter architecture
    - Python byte code compiler
    - Python virtual machine(pvm)
- Writing and Executing First Python Program
  - ✓ Using interactive mode
  - ✓ Using script mode
    - General text editor and command window
    - IDLE editor and IDLE shell
  - ✓ Understanding print() function
  - ✓ How to compile python program explicitly
- Python Language Fundamentals
  - ✓ Character set
  - ✓ Keywords
  - ✓ Comments
  - ✓ Variables
  - ✓ Literals
  - ✓ Operators
  - ✓ Reading input from console
  - ✓ Parsing string to int, float
- Python Conditional Statements
  - ✓ If statement
  - ✓ If else statement
  - ✓ If elif statement
  - ✓ If elif else statement
  - ✓ Nested if statement
- Looping Statements
  - ✓ While loop
  - ✓ For loop
  - ✓ Nested loops
  - ✓ Pass, break and continue keywords
- Standard Data Types
  - ✓ Int, float, complex, bool, nonetype
  - ✓ Str, list, tuple, range

NBIT COURSES

NBIT
Quality is Our Strength...

navbharat
institute of technology
Software & Hardware Education

Recognized By
Nielit(Doeacc)

  - ✓ Dict, set, frozenset
- String Handling
  - ✓ What is string
  - ✓ String representations
  - ✓ Unicode string
  - ✓ String functions, methods
  - ✓ String indexing and slicing
  - ✓ String formatting
- Python List
  - ✓ Creating and accessing lists
  - ✓ Indexing and slicing lists
  - ✓ List methods
  - ✓ Nested lists
  - ✓ List comprehension
- Python Tuple
  - ✓ Creating tuple
  - ✓ Accessing tuple
  - ✓ Immutability of tuple
- Python Set
  - ✓ How to create a set
  - ✓ Iteration over sets
  - ✓ Python set methods
  - ✓ Python frozenset
- Python Dictionary
  - ✓ Creating a dictionary
  - ✓ Dictionary methods
  - ✓ Accessing values from dictionary
  - ✓ Updating dictionary
  - ✓ Iterating dictionary
  - ✓ Dictionary comprehension
- Python Functions
  - ✓ Defining a function
  - ✓ Calling a function
  - ✓ Types of functions
  - ✓ Function arguments
    - Positional, keyword arguments
    - Default, non-default arguments
    - Arbitrary arguments, keyword arbitrary arguments
  - ✓ Function return statement
  - ✓ Nested function
  - ✓ Function as argument
  - ✓ Function as return statement
  - ✓ Decorator function
  - ✓ Closure
  - ✓ Map(), filter(), reduce(), any() functions
  - ✓ Anonymous or lambda function
- Modules & Packages
  - ✓ Why modules
  - ✓ Script v/s module
  - ✓ Importing module

- ✓ Standard v/s third party modules
- ✓ Why packages
- ✓ Understanding pip utility
- File I/O
  - ✓ Introduction to file handling
  - ✓ File modes
  - ✓ Functions and methods related to file handling
  - ✓ Understanding with block

Advance Python

- Regular Expressions(Regex)
  - ✓ Need of regular expressions
  - ✓ Re module
  - ✓ Functions/methods related to regex
  - ✓ Meta characters & special sequences
- Object Oriented Programming
  - ✓ Procedural v/s Object Oriented Programming
  - ✓ OOP Principles
  - ✓ Inheritanc
  - ✓ Defining a Class & Object Creation
  - ✓ Encapsulation
  - ✓ Polymorphism
  - ✓ Abstraction
  - ✓ Garbage Collection
  - ✓ Iterator & Generator
- Exception Handling
  - ✓ Difference Between Syntax Errors and Exceptions
  - ✓ Keywords used in Exception Handling
    - try , except , finally , raise , assert
  - ✓ Types of Except Blocks
  - ✓ User-defined Exceptions
- GUI Programming
  - ✓ Introduction to Tkinter Programming
  - ✓ Tkinter Widgets
  - ✓ Layout Managers
  - ✓ Event handling
  - ✓ Displaying image
- Multi-Threading Programming
  - ✓ Multi-processing v/s Multi-threading
  - ✓ Need of threads
  - ✓ Creating child threads

NBIT COURSES

NBIT Quality is Our Strength...

navbharat institute of technology
Software & Hardware Education

Recognized By Nielit(Doeacc)

  - ✓ Functions /methods related to threads
  - ✓ Thread synchronization and locking
- SQL Using MySQL
- Introduction to RDBMS
  - ✓ What is Relational Database Package
  - ✓ Difference between SQL & Database
  - ✓ Installing MySQL Server database
- SQL Basic
  - ✓ DDL: Create, Alter, Drop, etc.
  - ✓ DML: Insert, Update, Delete, etc.
  - ✓ DQL : Select
  - ✓ Auto_increment field
  - ✓ SQL Comments
  - ✓ SQL Aliases
  - ✓ Savepoint & rollback
- SQL Constraints
  - ✓ Not NULL, Unique key
  - ✓ Primary key, Check
  - ✓ Default, Foreign key
  - ✓ SQL Operators
  - ✓ Arithmetic operators
  - ✓ Logical operators
  - ✓ Conditional operators
  - ✓ Like, between, in operators
- SQL Clauses
  - ✓ Order by
  - ✓ Where
  - ✓ Limit/top
  - ✓ Group by
  - ✓ having
- SQL Joins
  - ✓ Inner Join
  - ✓ Left Join
  - ✓ Right Join
  - ✓ Full Join
- SQL View
  - ✓ creating view
  - ✓ updating view
  - ✓ fetching data from view
- SQL Functions
  - ✓ String functions
  - ✓ Aggregate functions
  - ✓ Date & time functions
- Stored Procedures & Functions
  - ✓ Understanding stored procedures and their key benefits
  - ✓ Working with stored procedures
  - ✓ Studying user-defined functions

- Working with CSV Files
  - ✓ How to write result to csv file
  - ✓ How to read csv file
- Python Database Connectivity
  - ✓ Database Drivers and connectors
  - ✓ Creating connection object
  - ✓ Understanding cursor obje ct
  - ✓ Executing SQL statements using curso r
  - ✓ Fetching records fromcurs or
  - ✓ Storing and retrieving Date and Time
- MONGODB
- Introduction To MongoDB
  - ✓ Understanding NoSQL DB
  - ✓ NoSQL vs. SQL DB
  - ✓ Understanding Mongo DB
  - ✓ Downloading & Installation
  - ✓ Downloading & Installation
  - ✓ Introduction of MongoDB shell and Compass
  - ✓ Understanding database, collection & document
- Crud Operations
  - ✓ Insert Document
  - ✓ Delete Document
  - ✓ Update Document
  - ✓ Query Document
- Operators In MongoDB
  - ✓ Query and Projection operators
  - ✓ Update operator
  - ✓ Aggregation Pipeline operators
- Methods In MongoDB
  - ✓ limit and sort
  - ✓ bulk methods
  - ✓ other methods
- Indexing And Relationships
  - ✓ Types of Indexes
  - ✓ Creating Dropping an Indexes
  - ✓ Defining Relationships between Documents
- Python Connectivity With MongoDB
  - ✓ Introduction to pymongo
  - ✓ Installing pymongo module
  - ✓ MongoClient
  - ✓ Getting database and collection
  - ✓ CRUD operations
  - ✓ Range Queries
