Distinguish Yourself

Successful students can be distinguished from the average student by their attitudes and behaviors. Below are some profiles that typically distinguish between an “A” student & a “B” student. Where do you fit in this scheme?

The “A” Student – An Outstanding Student

ATTENDANCE:

“A” students have virtually perfect attendance. Their commitment to the class is a high priority and exceeds other temptations.

PREPARATION:

“A” students are prepared for class. They always read the assignment. Their attention to detail is such that they occasionally can elaborate on class examples.

CURIOSITY:

“A” students demonstrate interest in the class and the subject. They look up or dig out what they don't understand. They often ask interesting questions or make thoughtful comments.

RETENTION:

“A” students have retentive minds and practice making retentive connections. They are able to connect past learning with the present. They bring a background of knowledge with them to their classes. They focus on learning concepts rather than memorizing details.

ATTITUDE:

“A” students have a winning attitude. They have both the determination and the self discipline necessary for success. They show initiative. They do things they have not been told to do.

TALENT:

“A” students demonstrate a special talent. It may be exceptional intelligence and insight. It may be unusual creativity , organizational skills, commitment – or a some combination. These gifts are evident to the teacher and usually to the other students as well.

EFFORT:

“A” students match their effort to the demands of an assignment.

COMMUNICATIONS:

“A” students place a high priority on writing and speaking in a manner that conveys clarity and thoughtful organization. Attention is paid to conciseness and completeness.

RESULTS:

“A” students make high grades on tests – usually the highest in the class. Their work is a pleasure to grade.

Distinguish Yourself

Successful students can be distinguished from the average student by their attitudes and behaviors. Below are some profiles that typically distinguish between an “A” student & a “B” student. Where do you fit in this scheme?

The “B” Student – An Average Student

ATTENDANCE:

“B” students are often late and miss class frequently. They put other priorities ahead of academic work. In some cases, their health or constant fatigue renders them physically unable to keep up with the demands of high-level performance.

PREPARATION:

“B” students may prepare their assignments consistently, but often in a perfunctory manner. Their work may be sloppy or careless. At times, it is incomplete or late.

CURIOSITY:

“B” students seldom explore topics deeper than their face value. They lack vision and bypass interconnectedness of concepts. Immediate relevancy is often their singular test for involvement.

RETENTION:

“B” students retain less information and for shorter periods. Less effort seems to go toward organizing and associating learned information with previously acquired knowledge. They display short – term retention by relying on cramming sessions that focus on details, not concepts.

ATTITUDE:

“B” students are not visibly committed to class. They participate without enthusiasm. Their body language often expresses boredom.

TALENT:

“B” students vary enormously in talent. Some have exceptional ability but show undeniable signs of poor self management or bad attitudes. Others are diligent but simply average in academic ability.

EFFORT:

“B” students are capable of sufficient efforts, but either fail to realistically evaluate the effort needed to accomplish a task successfully, or lack the desire to meet the challenge.

COMMUNICATIONS:

“B” students communicate in ways that often limit comprehension or risk misinterpretation. Ideas are not well formulated before they are expressed. Poor listening/ reading habits inhibit matching inquiry and response.

RESULTS:

“B” students obtain mediocre or inconsistent results on tests. They have some concept of what is going on but clearly have not mastered the material.

Advanced excel

Duration:
2 Months

- 👍 Advanced Excel Course - Overview of the Basics of Excel
 - ✓ Customizing common options in Excel
 - ✓ Absolute and relative cells
 - ✓ Protecting and un-protecting worksheets and cells
- 👍 Advanced Excel Course- Working with Functions
 - ✓ Writing conditional expressions (using IF)
 - ✓ Using logical functions (AND, OR, NOT)
 - ✓ Using lookup and reference functions (VLOOKUP, HLOOKUP, MATCH, INDEX)
 - ✓ VlookUP with Exact Match, Approximate Match
 - ✓ Nested VlookUP with Exact Match
 - ✓ VlookUP with Tables, Dynamic Ranges
 - ✓ Nested VlookUP with Exact Match
- ✓ Using VLookUP to consolidate Data from Multiple Sheets
- ✓ Using VLookUP to consolidate Data from Multiple Sheets
- 👍 Advanced Excel Course - Data Validations
 - ✓ Specifying a valid range of values for a cell
 - ✓ Specifying a list of valid values for a cell
 - ✓ Specifying custom validations based on formula for a cell
- 👍 Advanced Excel Course - Working with Templates
 - ✓ Designing the structure of a template
 - ✓ Using templates for standardization of worksheets
- 👍 Advanced Excel Course - Sorting and Filtering Data
 - ✓ Sorting tables

- ✓ Using multiple-level sorting
- ✓ Using custom sorting
- ✓ Filtering data for selected view (AutoFilter)
- ✓ Using advanced filter options
- 👍 Advanced Excel Course - Working with Reports
 - ✓ Creating subtotals
 - ✓ Multiple-level subtotals
 - ✓ Creating Pivot tables
 - ✓ Formatting and customizing Pivot tables
 - ✓ Using advanced options of Pivot tables
 - ✓ Pivot charts
 - ✓ Consolidating data from multiple sheets and files using Pivot tables
 - ✓ Using external data sources
 - ✓ Using data consolidation feature to consolidate data
 - ✓ Show Value As (% of Row, % of Column, Running Total, Compare with Specific Field)
 - ✓ Viewing Subtotal under Pivot
 - ✓ Creating Slicers (Version 2010 & Above)
- 👍 Advanced Excel Course - More Functions
 - ✓ Date and time functions
 - ✓ Text functions
- 👍 Database functions
 - ✓ Power Functions (CountIf, CountIFS, SumIf, SumIFS)
- 👍 Advanced Excel Course - Formatting
 - ✓ Using auto formatting option for worksheets
 - ✓ Using conditional formatting option for rows, columns and cells
- 👍 Advanced Excel Course - Macros
 - ✓ Relative & Absolute Macros
 - ✓ Editing Macro
- 👍 Advanced Excel Course - What-If Analysis
 - ✓ Goal Seek
 - ✓ Data Tables
 - ✓ Scenario Manager
- 👍 Advanced Excel Course - Charts
 - ✓ Using Charts
 - ✓ Formatting Charts

- ✓ Using 3D Graphs
- ✓ Using Bar and Line Chart together
- ✓ Using Secondary Axis in Graphs
- ✓ Sharing Charts with PowerPoint / MS Word, Dynamically
- ✓ (Data Modified in Excel, Chart would automatically get updated)
- 👍 Advanced Excel Course - New

- Features Of Excel
- ✓ Sparklines, Inline Charts, data Charts
 - ✓ Overview of all the new features
 - 👍 Advanced Excel Course - Final Assignment
 - ✓ The Final Assignment would test contains questions to be solved at the end of the Course

VBA

- 👍 VBA (VISUAL BASIC FOR APPLICATION) & MACROS
- 👍 Create a Macro
 - ✓ Swap Values, Run Code from a Module, Macro Recorder, Use RelativeReferences, FormulaR1C1,
 - ✓ Add a Macro to the Toolbar, Macro Security, Protect Macro
- 👍 MsgBox
 - ✓ MsgBox Function, Input Box
- Function.
- 👍 Workbook and Worksheet Object
 - ✓ Path and Full Name, Close and Open, Loop through Books and Sheets, Sales Calculator, Files in a Directory, Import Sheets, Programming Charts
- 👍 Range Object
 - ✓ Current Region, Dynamic Range, Resize, Entire Rows

- and Columns, Offset, From Active Cell to Last Entry, Union and Intersect, Test a Selection, Possible Football Matches, Font, Background Colors, Areas Collection, Compare Ranges
- 👍 Variables
 - ✓ Option Explicit, Variable Scope, Life of Variables
 - ✓ If Then Statement
 - ✓ Logical Operators, Select Case, Tax Rates, Mod Operator, Prime Number Checker, Find Second Highest Value, Sum by Color, Delete Blank Cells
- 👍 Loop
 - ✓ Loop through Defined Range, Loop through Entire Column, Do Until Loop, Step Keyword, Create a Pattern, Sort Numbers, Randomly Sort Data, Remove Duplicates, Complex Calculations, Knapsack Problem
- 👍 Procedures and Functions
 - ✓ Subroutines vs Functions
- ✓ Calling procedures
- ✓ Passing arguments (ByVal vs ByRef)
- 👍 Macro Errors
 - ✓ Debugging, Error Handling, Err Object, Interrupt a Macro, Macro Comments
- 👍 String Manipulation
 - ✓ Separate Strings, Reverse Strings, Convert to Proper Case, Count Words
 - ✓ Date and Time
 - ✓ Compare Dates and Times, DateDif Function, Weekdays, Delay a Macro, Year Occurrences, Tasks on Schedule, Sort Birthdays
- 👍 Events
 - ✓ Before DoubleClick Event, Highlight Active Cell, Create a Footer Before Printing, Bills and Coins, Rolling Average Table
- 👍 Array
 - ✓ Dynamic Array, Array Function, Month Names, Size of an Array
- 👍 Function and Sub

- ✓ User Defined Function, Custom Average Function, Volatile Functions, ByRef and ByVal

👉 Application Object

- ✓ Status Bar, Read Data from Text File, Write Data to Text File

👉 ActiveX Controls

- ✓ Text Box, List Box, Combo Box, Check Box, Option Buttons, Spin Button, Loan Calculator

👉 User form

- ✓ User form and Ranges, Currency Converter, Progress Indicator, Multiple List Box Selections,

AI

👉 Introduction to Excel + AI

- ✓ Overview of Excel's capabilities
- ✓ What is AI in the context of spreadsheets?
- ✓ Introduction to ChatGPT, Microsoft Copilot, and other
- ✓ Automation, analysis, decision support

👉 Built-in AI Features in Excel

- ✓ Flash Fill for pattern recognition
- ✓ Analyze Data (Ideas) for instant insights
- ✓ Smart Data Types for enriched datasets
- ✓ Power Query AI: Column from

Examples

- ✓ Dynamic Arrays: FILTER, SORT, UNIQUE, SEQUENCE

👉 ChatGPT + Excel Integration

- ✓ Generate formulas and troubleshoot errors
- ✓ Explain Excel functions and logic
- ✓ Create dashboards and reports
- ✓ Automate repetitive tasks (e.g., cleaning data)
- ✓ Prompt engineering for Excel tasks
- ✓ Budgeting, Forecasting, HR analytics

👉 AI-Enhanced Data Analysis

- ✓ Predictive modeling with:

- ✓ FORECAST.ETS
- ✓ TREND, GROWTH, LINEST
- ✓ Scenario analysis using:
- ✓ Goal Seek
- ✓ Solver
- ✓ AI-powered conditional formatting
- ✓ Using ChatGPT to interpret charts and trends

👉 Automation with Excel + AI

- ✓ Introduction to Power Automate
- ✓ Creating workflows with Excel triggers

- ✓ Using ChatGPT to design automation logic
- ✓ Connecting Excel with Outlook, Teams, and other apps

👉 Custom AI Solutions

- ✓ Using LAMBDA and LET for custom functions
- ✓ Building AI-like logic with IF, IFS, SWITCH
- ✓ ChatGPT-assisted VBA scripting
- ✓ Creating intelligent templates and tools
