Software & Hardware Education

Distinguish Yourself

Successful students can be distinguished from the average student by their attitudes and behaviors. Below are some profiles that typically distinguish between an “A” student & a “B” student. Where do you fit in this scheme?

The “A” Student – An Outstanding Student

ATTENDANCE:

“A” students have virtually perfect attendance. Their commitment to the class is a high priority and exceeds other temptations.

PREPARATION:

“A” students are prepared for class. They always read the assignment. Their attention to detail is such that they occasionally can elaborate on class examples.

CURIOSITY:

“A” students demonstrate interest in the class and the subject. They look up or dig out what they don't understand. They often ask interesting questions or make thoughtful comments.

RETENTION:

“A” students have retentive minds and practice making retentive connections. They are able to connect past learning with the present. They bring a background of knowledge with them to their classes. They focus on learning concepts rather than memorizing details.

ATTITUDE:

“A” students have a winning attitude. They have both the determination and the self discipline necessary for success. They show initiative. They do things they have not been told to do.

TALENT:

“A” students demonstrate a special talent. It may be exceptional intelligence and insight. It may be unusual creativity , organizational skills, commitment – or a some combination. These gifts are evident to the teacher and usually to the other students as well.

EFFORT:

“A” students match their effort to the demands of an assignment.

COMMUNICATIONS:

“A” students place a high priority on writing and speaking in a manner that conveys clarity and thoughtful organization. Attention is paid to conciseness and completeness.

RESULTS:

“A” students make high grades on tests – usually the highest in the class. Their work is a pleasure to grade.

Distinguish Yourself

Successful students can be distinguished from the average student by their attitudes and behaviors. Below are some profiles that typically distinguish between an “A” student & a “B” student. Where do you fit in this scheme?

The “B” Student – An Average Student

ATTENDANCE:

“B” students are often late and miss class frequently. They put other priorities ahead of academic work. In some cases, their health or constant fatigue renders them physically unable to keep up with the demands of high-level performance.

PREPARATION:

“B” students may prepare their assignments consistently, but often in a perfunctory manner. Their work may be sloppy or careless. At times, it is incomplete or late.

CURIOSITY:

“B” students seldom explore topics deeper than their face value. They lack vision and bypass interconnectedness of concepts. Immediate relevancy is often their singular test for involvement.

RETENTION:

“B” students retain less information and for shorter periods. Less effort seems to go toward organizing and associating learned information with previously acquired knowledge. They display short – term retention by relying on cramming sessions that focus on details, not concepts.

ATTITUDE:

“B” students are not visibly committed to class. They participate without enthusiasm. Their body language often expresses boredom.

TALENT:

“B” students vary enormously in talent. Some have exceptional ability but show undeniable signs of poor self management or bad attitudes. Others are diligent but simply average in academic ability.

EFFORT:

“B” students are capable of sufficient efforts, but either fail to realistically evaluate the effort needed to accomplish a task successfully, or lack the desire to meet the challenge.

COMMUNICATIONS:

“B” students communicate in ways that often limit comprehension or risk misinterpretation. Ideas are not well formulated before they are expressed. Poor listening/ reading habits inhibit matching inquiry and response.

RESULTS:

“B” students obtain mediocre or inconsistent results on tests. They have some concept of what is going on but clearly have not mastered the material.

CORE JAVA

Duration:
6 Months

- 👉 INTRODUCTION TO JAVA
 - ✓ Why Java was Developed
 - ✓ Application Areas of Java
 - ✓ History of Java
 - ✓ Platform Independency in Java
 - ✓ USP of Java: Java Features
 - ✓ Sun-Oracle Deal
 - ✓ Different Java Platforms
 - ✓ Difference between JDK,JRE,JVM
 - ✓ Java Versions
 - ✓ JVM Architecture
 - ✓ Installing Java on Windows
 - ✓ Understanding Path Variable: Why Set Path
- 👉 CREATING FIRST JAVA PROGRAM
 - ✓ Understanding Text Editors to Write Programs
 - ✓ How to compile java file
 - ✓ Byte Code and class file
 - ✓ How to run class file
 - ✓ JAVA LANGUAGE
- FUNDAMENTALS
 - ✓ Identifiers
 - ✓ Keywords
 - ✓ Variables
 - ✓ Literals
 - ✓ Data Types
 - ✓ Operators
 - ✓ Comments
 - ✓ Looping Statements
 - ✓ Condition Statements
 - ✓ Type Casting
- 👉 OOP IMPLEMENTATION (PIE)
 - ✓ Why OOP
 - ✓ OOP Concepts with Real life examples
 - ✓ Class& it's Syntax
 - ✓ Object& it's Syntax
 - ✓ Reference Variable
 - ✓ Constructors
 - ✓ Instance (Non-Static) & Static Variables
 - ✓ Instance(Non-Static) & Static

- Methods
 - ✓ This Keyword and it's usages
 - ✓ Object & Static Initializers (Anonymous Blocks)
 - ✓ Understanding '+' Operator
 - ✓ Inheritance& it's Syntax
 - ✓ Types of Inheritance
 - ✓ Object Class as Root of Java Class Hierarchy
 - ✓ Variable Hiding
 - ✓ Method Hiding
 - ✓ Method Overriding
 - ✓ Method Overloading
 - ✓ Super keyword and it's usages
 - ✓ Final keyword and it's usages
 - ✓ Constructor Chaining
 - ✓ Upcasting and Downcasting
 - ✓ Static &Dynamic Binding
 - ✓ Run Time Polymorphism
 - ✓ Abstract Keyword(Abstract classes and methods)
 - ✓ Understanding Interfaces
 - ✓ Implementation of Encap - sulation
 - ✓ Association with Imple -
- mentation
 - 👉 PACKAGES
 - ✓ Understanding Packages
 - ✓ Setting Class path
 - ✓ Reading Input from Keyboard
 - ✓ Access Modifiers
 - ✓ With in Package & Outside Package Implements
 - 👉 NESTED TYPES
 - ✓ Static Nested Class
 - ✓ Non-static Nested Class
 - ✓ Local Class
 - ✓ Anonymous Class
 - ✓ Nested Interface
 - 👉 ARRAYS
 - ✓ General Definition of Array
 - ✓ Advantages from Array
 - ✓ Arrays in Java
 - ✓ 1-d Arrays
 - ✓ 2-d Arrays
 - ✓ Jagged Arrays
 - ✓ Array of reference type
 - ✓ Operations on Arrays
 - ✓ User Define Array & Object Type
 - 👉 COMMAND LINE ARGUMENTS

AND WRAPPER CLASSES

- ✓ How to read command line arguments
- ✓ Wrapper Classes
- ✓ Parsing of Numeric Strings
- ✓ String representation of Primitives

EXCEPTION HANDLING

- ✓ Types of Runtime Errors
- ✓ Understanding Exceptions
- ✓ Exception Class Hierarchy
- ✓ Try & Catch Blocks
- ✓ Patterns of Catch Block
- ✓ Nested Try statements
- ✓ Throw, throws and finally
- ✓ Creating Custom Exceptions
- ✓ Checked & Unchecked Exceptions
- ✓ Assertion

WORKING WITH STRINGS

- ✓ What is String
- ✓ String Class
- ✓ Creating String Object
- ✓ Operations on String
- ✓ String Buffer Class and it's

Methods

- ✓ Difference between String and StringBuffer class
- ✓ String Builder Class and it's Methods
- ✓ Difference between String Buffer and String Builder

SWING

- ✓ Introduction to AWT
- ✓ Introduction to Swing Components
- ✓ Look And Feel of Swing Components
- ✓ MVC Architecture of Swing Components
- ✓ Working with Image
- ✓ Advance Swing Components
 - OptionPane, Jtree, Jtable, JTabbedPane
 - Jfile Chooser, Jcolor Choose
- ✓ Menu Components
 - JMenu
 - JMenu Item
 - JMenu bar

MULTITHREADED PROGRAM - MING

✓ Multitasking: Why Concurrent Execution

- ✓ Multiprocessing v/s Multithreading
- ✓ Main Thread (Default Java Thread)
- ✓ Creating Child Threads and understanding context switching
- ✓ Thread States
- ✓ Thread Group
- ✓ Thread Synchronization: Methods and Blocks
- ✓ Inter-Thread communication
- ✓ Daemon Threads
- ✓ Deadlock

I/O STREAMS

- ✓ What is I/O
- ✓ Why Need Streams
- ✓ Byte Streams and Character Streams
- ✓ Read/Write operations with file
- ✓ Scanner Class
- ✓ Object Serialization&

Deserialization

- ✓ Transient keyword
- ✓ File Class and it's Methods

SOCKET PROGRAMMING

- ✓ Understanding Fundamentals of a Network
- ✓ Socket and Server Socket Classes
- ✓ Inet Address Class
- ✓ Datagram Socket and Datagram Packet Classes
- ✓ URL, URL Connection, Http URL Connection Classes

REFLECTION

- ✓ Understanding the Need Of Reflection
- ✓ Getting information about class's modifiers, fields, methods, constructors and super classes
- ✓ Finding out constant and method declaration belong to an interface
- ✓ Creating an instance of the class whose name is not known until runtime
- ✓ Getting and setting values of

an object's field if field name
is unknown until runtime

(PROJECT BASED)

👍 DATABASE PROGRAMMING
USING JDBC

- ✓ Invoking a method on an object if the method is unknown until runtime

- ✓ Need Of JDBC
- ✓ JDBC Drivers Comparable Interfaces
- ✓ Statement, PreparedStatement, CallableStatement

👍 EXTENDED & UTILITY CONCEPTS

- ✓ Generics
- ✓ Lambda Expression
- ✓ Annotations
- ✓ Object Cloning
- ✓ Vargs
- ✓ Static-import
- ✓ Enum
- ✓ Static, Default and Private Methods of Interface
- ✓ Var Type
- ✓ Java Modules
- ✓ Stream API

- ✓ Scrollable and Updatable Result Set
- ✓ Batch Updates
- ✓ Transaction
- ✓ Metadata
- ✓ Connection Data Base
 - Oracle
 - My SQL
 - Mongo DB

👍 INTRODUCTION TO SQL

ADVANCE JAVA

👍 COLLECTIONS FRAMEWORK

- ✓ What is Collection?
- ✓ What is Framework?
- ✓ Collections Framework
- ✓ Core Interfaces
- ✓ Collection, List, Queue,

Deque

✓ java.util.Date

✓ Set, Navigable Set, Sorted Set

✓ java.util.Calendar

✓ Map, Navigable Map, Sorted Map

✓ java.sql.Date

✓ Core Classes

👍 SYSTEM PROPERTIES & INTERNATIONALIZATION (I18N)

✓ Array List, Linked List, Priority Queue, Array Deque

✓ Understanding Locale

✓ Hash Set, Linked Has Set, Tree Set,

✓ Resource Bundle

✓ Hash Map, Identity Hash Map, Weak Hash Map, Linked Hash Map, Tree Map

✓ Usage of properties file

✓ Fetching text from Resource Bundle

✓ Accessing a Collection via an Iterator

✓ Displaying the text in HINDI

✓ Displaying date in HindiJAVA

✓ Accessing List via List Iterator

✓ Accessing a Collection via for each loop

👍 EE(JAVA PLATFORM ENTERPRISE EDITION)

✓ Understanding the Concept of Java EE:JEE Specification

✓ Working with User Defined Objects

✓ Java EE Architecture

- Single Tier
- Two Tier
- Three Tier
- N-Tier

✓ The Comparator and

✓ The Legacy classes and Interfaces.

✓ Java EE Components

✓ Enumeration, Vector ,Stack

✓ Web Components

✓ Hash table, Properties

✓ Distributed(Business) Components

👍 DATE & TIME API

✓ Java EE Containers& Servers

- Web Container& Web Server (Apache Tomcat)
- ✓ EJB Container& Application Server (Web logic, Glass fish, Web sphere)
- ✓ Java EE Services
 - JNDI Service
 - Java Transaction Service
 - JAAS
 - JMS
- ☝ JAVA SERVLET
 - ✓ Introduction to web programming
 - ✓ File Uploading and Down - loading
 - ✓ Session Tracking & State Management
 - Cookie
 - Url Rewriting
 - Hidden F+orm Field
 - Session Object
 - ✓ Events & Listeners
 - ✓ Dependency Injection
 - ✓ Refreshing Servlet
 - ✓ Filters
- ☝ JAVA SERVER PAGES & JSTL
- ✓ JSP Architecture
- ✓ JSP Elements
- ✓ JSP Objects
- ✓ Understanding Java Beans
- ✓ Custom Tags
- ✓ Using tags of JSTL
- ✓ Expression Language
- ☝ PROJECT CLASSES
 - ✓ Front End Coding
 - ✓ FORM DESIGNING
 - HTML
 - CSS
 - JAVA SCRIPT
 - BOOTSTRAP
 - ✓ Back End Coding
 - ✓ DATABASE DESIGNING
 - ✓ Connecting forms to database
 - ✓ Writing Business Logic
 - ✓ Project Hosting
- ☝ DESIGN PATTERN
 - ✓ Why Design Patterns...?
 - ✓ Front Controller
 - ✓ Composite View
 - ✓ Factory Pattern

- ✓ Singleton Pattern
- ✓ DAO Pattern
- ☝ JAVA MAIL API
 - ✓ Email System and Protocols
 - ✓ Sending & Receiving Mails
 - ✓ Handling Attachments
- ☝ INTRODUCTION TO DISTRIBUTED PROGRAMMING
 - ✓ RMI
 - ✓ Web Services
- ☝ INTRODUCTION TO REST FULL SERVICES
 - ✓ @PathParam
 - ✓ @Path
 - ✓ @FormParam
 - ✓ @QueryParam
 - ✓ @DefaultValue
- ☝ OVERVIEW OF JPA FRAME WORK

USP,

1. HIGHLY QUALIFIED & EXPERIENCED FACULTIES
2. STUDENT SUPPORT SERVICES
3. STUDENT CAREER SERVICES
4. AFFORDABLE FEE STRUCTURE
5. LEARNING AT YOUR CONVENIENCE
6. INTERACTIVE STUDY MATERIAL
7. REGULAR PRACTICAL
8. GENERATOR FACILITY
9. 1 : 1 STUDENT COMPUTER RATIO
10. INTERACTIVE LEARNING
